Hindi, Hinglish, English+

Built for SMEs
High ROI & Conversion

PLATFORM OVERVIEW

The Creation of Voice

Vaakriti is a zero-code, multilingual AI voice agent platform that enables businesses to automate customer conversations, operations, and transactions over phone, WhatsApp, and web — just like a human executive.

Answer & Engage

Handle customer calls 24/7 with natural, human-like conversations. Understand colloquial terms, customer intent, and handle interruptions gracefully.

Qualify & Book

Capture leads, verify caller requirements, check real-time availability, and confirm appointments on the fly without calendar conflicts.

Transact on Call

Generate GST-compliant tax invoices and collect direct payments via UPI QR codes sent to WhatsApp during the active phone conversation.

Track & Grow

Access complete call recordings, live transcripts, detailed lead summaries, and conversion analytics directly in your business dashboard.

SYSTEM ARCHITECTURE

How Vaakriti Works

A unified, real-time voice operations infrastructure that combines telephony, AI, business data, and payments into a seamless workflow.

Instant	Live Sync	99.9%	60 sec

CORE CAPABILITIES

A Complete Voice Operations Suite

Everything you need to run, automate, and scale your customer conversations.

Natural Voice Conversations

Human-like, multilingual (Hindi, Hinglish, English+) with dynamic code-switching support and natural conversation pace.

Dynamic Operations Brain

Update prices, appointment slots, inventory, or business policies in real time (via spoken voice or dashboard) — zero code required.

In-Call Commerce

Automated GST invoice generation and instant UPI payment link delivery while the customer is actively on the call.

Payment Verification (OCR)

Automatically read, extract, and verify 12-digit bank UTR numbers from customer WhatsApp screenshots across GPay, PhonePe, and Paytm.

Human Handover & Failover

Smart call transfer to your team with warm context and zero customer drop. Loop-proof routing prevents infinite voicemail loops.

BUSINESS APPLICATIONS

Built for Real Businesses

A versatile voice agent platform for Indian and global SMEs across multiple high-volume industries.

Healthcare & Clinics

Automated doctor appointment scheduling, patient inquiries, consultation reminders, and diagnostic test booking.

Retail & D2C

Product inquiries, telephone order booking, return/exchange queries, and instant in-call UPI payment collection.

Logistics & Courier

Real-time shipment tracking, address verification, pickup scheduling, and delivery status notifications.

Service Businesses

Lead qualification, service quotes, home service technician dispatch, and automated feedback collection.

Education & Institutes

Course curriculum information, fee details, admission counselling automation, and demo session scheduling.

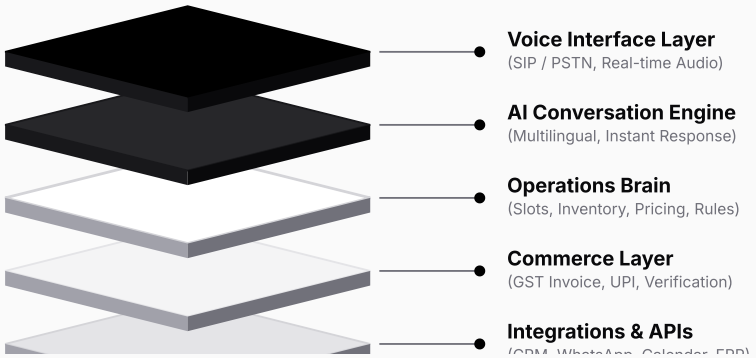

Manufacturing & B2B

Wholesale order inquiries, dealer distributor support, catalog dispatch, and factory dispatch tracking.

TECHNOLOGY & INTEGRATIONS

Enterprise-Grade Technology

A robust, scalable, and API-first platform built for high-volume, real-time voice operations.

KEY INTEGRATIONS

SIP / PSTN
Airtel, Jio, Vi

WhatsApp
Business Cloud API

UPI Direct
GPay, PhonePe, Paytm

APIs & Webhooks
CRM & ERP Sync

SECURITY & COMPLIANCE

Secure. Compliant. Reliable.

Enterprise-grade security and regulatory compliance to keep your business and customer data safe.

Data Protection

AES-256 encryption for data at rest and in transit. Transcripts and recordings are stored securely with zero unauthorized access.

Privacy by Design

Role-based team access controls, immutable audit logs, and complete tenant data isolation across all accounts.

Regulatory Ready

TRAI and DLT compliant for commercial telephony in India. Strictly respects calling hours (09:00 - 21:00) and DND preferences.

High Availability

Built for enterprise scale with 99.9% telephony uptime and automatic carrier failover to prevent missed calls.

Secure Infrastructure

Hosted on trusted enterprise cloud infrastructure with continuous monitoring, redundant backups, and DDoS protection.

GET STARTED

Go Live in 60 Seconds

Create, configure, and deploy your own AI voice agent — no coding, no complex setup.

01

Create Account

Sign up and set your business profile and branding details in seconds.

→

02

Configure Agent

Add your offerings, appointment slots, and rules (via voice or simple form).

→

03

Go Live

Your dedicated voice agent is live and ready to take calls instantly.
