Teach Your AI Simply By Speaking

Business changes daily. A doctor steps out, a menu item runs out, or holiday hours apply. You don't need a developer or technical support — just tell your AI what changed.

EXAMPLE 01

Schedule & Doctor Changes

Just say it or type it into your dashboard. The bot adjusts appointment bookings immediately.

You say: "Dr. Verma is on leave this Saturday. Offer Monday morning instead."
✓ AI updates instantly for all upcoming calls.

EXAMPLE 02

Inventory & Stock Levels

Avoid promising products or rooms that aren't available. Let the AI know what's in stock.

You say: "We only have Deluxe rooms available tonight, Standard is sold out."
✓ Callers are smoothly guided to available options.

EXAMPLE 03

Discounts & Special Offers

Run temporary campaigns or weekend promotions whenever you choose.

You say: "Give 15% discount on full body checkup for festival week."
✓ AI applies correct pricing and invoice amounts.

WHY BUSINESS OWNERS LOVE THE OPERATIONS BRAIN

- ✓ **Zero Waiting Time:** Your changes apply within seconds across all customer phone lines.
- ✓ **Works in Your Language:** Speak in simple Hindi, English, or mixed Hinglish.
- ✓ **No Tech Skills Required:** No coding, no spreadsheets, and no complicated setup forms.
- ✓ **Complete Activity Log:** Easily view the history of what instructions were given and when.
