AI VOICE ASSISTANT & IN-CALL COMMERCE PLATFORM

The voice assistant that actually runs your business.

Answer every customer call 24/7 in natural Hindi, English, or Hinglish. Take appointments, manage customer orders, send official GST invoices on WhatsApp, and collect UPI payments — all while talking on the call.

24/7 SMART VOICE CALLS

ZERO MISSED CALLS

Speaks like a warm, knowledgeable member of your staff. Responds instantly with natural pauses and handles conversations effortlessly without robotic delays.

SPEAK TO UPDATE BRAIN

NO TECH NEEDED

Teach your AI anytime by speaking into your dashboard: "Doctor won't be in today after 4 PM" or "Apply 10% festive discount". The bot updates instantly.

IN-CALL GST INVOICING

WHATSAPP + UPI

The moment a caller agrees to a service or order, a branded GST tax invoice and instant UPI QR code are sent directly to their WhatsApp while they're on the line.

PAYMENT SCREENSHOT CHECK

AUTO RECONCILE

When customers send payment screenshots on WhatsApp, Vaakriti automatically reads the transaction ID (UTR), marks the invoice as paid, and alerts you.

Everything Your Business Needs On Calls

Most voice bots only give canned answers and drop the lead when it's time to take action. Vaakriti manages the entire customer journey from the first greeting to confirmed payment.

HOW IT WORKS FOR YOUR CUSTOMERS

STEP 1
Customer Calls
Answers in 1 ring 24/7

→

STEP 2
Natural Discussion
Checks live slots & items

→

STEP 3
Invoice on WhatsApp
UPI QR sent during call

→

STEP 4
Instant Confirmation
Payment verified & booked

KEY FEATURES AT A GLANCE

Hindi, English & Hinglish
Understands mixed colloquial speech naturally without requiring customers to pick a specific language.

Human-Paced Voice
Fast, responsive conversational flow. Callers can interrupt anytime and the AI listens attentively.

Never Books the Same Slot Twice
Directly connected to your appointment calendar so customers are only offered open, available times.

Official GST Invoices
Generates clean, professional PDF tax bills with your GST number, company logo, and proper HSN/SAC codes.

Safe Call Forwarding
Transfers complex inquiries to your personal phone smoothly with zero dropped calls or infinite rings.

Live Revenue Tracking
View every call, appointment, lead status, and payment received on a clean, centralized dashboard.

Teach Your AI Simply By Speaking

Business changes daily. A doctor steps out, a menu item runs out, or holiday hours apply. You don't need a developer or technical support — just tell your AI what changed.

EXAMPLE 01

Schedule & Doctor Changes

Just say it or type it into your dashboard. The bot adjusts appointment bookings immediately.

You say: "Dr. Verma is on leave this Saturday. Offer Monday morning instead."
✓ AI updates instantly for all upcoming calls.

EXAMPLE 02

Inventory & Stock Levels

Avoid promising products or rooms that aren't available. Let the AI know what's in stock.

You say: "We only have Deluxe rooms available tonight, Standard is sold out."
✓ Callers are smoothly guided to available options.

EXAMPLE 03

Discounts & Special Offers

Run temporary campaigns or weekend promotions whenever you choose.

You say: "Give 15% discount on full body checkup for festival week."
✓ AI applies correct pricing and invoice amounts.

WHY BUSINESS OWNERS LOVE THE OPERATIONS BRAIN

- ✓ **Zero Waiting Time:** Your changes apply within seconds across all customer phone lines.
- ✓ **Works in Your Language:** Speak in simple Hindi, English, or mixed Hinglish.
- ✓ **No Tech Skills Required:** No coding, no spreadsheets, and no complicated setup forms.
- ✓ **Complete Activity Log:** Easily view the history of what instructions were given and when.

Send WhatsApp Invoices & Collect UPI On the Call

When businesses send payment links hours after a call, most customers change their minds. With Vaakriti, customers receive their invoice and scan-to-pay QR code on WhatsApp while still talking to the assistant.

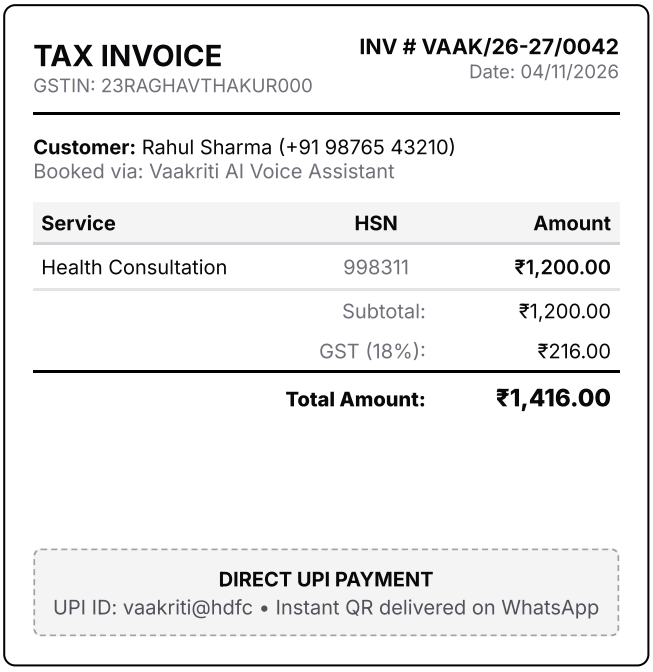

THE IN-CALL PAYMENT FLOW

1. Customer Confirms Order
The caller agrees on a service, consultation, or package. The AI verifies their name and details.

2. Branded GST Invoice Created
A PDF invoice is automatically formatted with your company logo, address, and GST calculation.

3. Dispatched to Customer's WhatsApp
The customer's phone buzzes with the PDF bill and a UPI QR code while they are still on the line.

4. Money Straight to Your Bank Account
Funds go directly into your HDFC, ICICI, SBI, or any bank account. Vaakriti never holds your money.

TAX INVOICE
GSTIN: 23RAGHAVTHAKUR000

INV # VAAK/26-27/0042
Date: 04/11/2026

Customer: Rahul Sharma (+91 98765 43210)
Booked via: Vaakriti AI Voice Assistant

Service	HSN	Amount
Health Consultation	998311	₹1,200.00
	Subtotal:	₹1,200.00

	Total Amount:	**₹1,416.00**

DIRECT UPI PAYMENT
UPI ID: vaakriti@hdfc • Instant QR delivered on WhatsApp

*Based on internal estimates; results vary by deployment.

Automated Receipt Checks & Smart Call Transfers

Never waste time asking customers "Did you send the screenshot?" or manually checking your banking app. Vaakriti verifies payment proof automatically and transfers important calls without confusion.

PAYMENT VERIFICATION — AUTOMATIC

WhatsApp Screenshot Verification

Customers frequently pay via Google Pay, PhonePe, or Paytm and send a screenshot. Vaakriti reads the image automatically:

- ✓ **Finds the 12-Digit Reference (UTR):** Checks the transaction number to ensure it's genuine and not a duplicate.
- ✓ **Validates Success Status:** Confirms the payment went through rather than being "Pending" or "Failed".
- ✓ **Matches Exact Bill Amount:** Verifies the payment matches the invoice before confirming the booking.
- ✓ **Sends Instant Receipt:** Automatically replies on WhatsApp confirming the booking and notifies the owner.

CALL FORWARDING — LOOP-PROOF

Smooth Call Transfer to Owner

Ordinary voice bots create endless forwarding loops when transferring to a busy phone. Vaakriti handles transfers with care:

- ✓ **No Infinite Loops:** If your phone is busy or unreachable, the bot takes a message instead of disconnecting or looping.
- ✓ **VIP Priority List:** Key clients, family, and direct partners can be routed directly to your personal phone.
- ✓ **Reassures the Caller:** Talks gently to the customer while connecting them so they don't hang up in silence.
- ✓ **Full Context Summary:** When you pick up, you already know the caller's name and what they need.

Manage Everything From One Simple Dashboard

VAAKRITI

A clean, intuitive control panel built for business owners and team members. Monitor all phone calls, bookings, customer inquiries, and collected payments in real time.

1. Live Call Logs & Audio Recordings

Review every customer conversation with full audio playback and written transcripts in Hindi or English. See customer intent and satisfaction instantly.

2. Appointments & Booking Calendar

Manage all customer reservations in one shared view. Easily reschedule, mark attendance, or trigger automated reminder messages to reduce no-shows.

3. Revenue & Payment Ledger

Track total revenue collected from phone calls. See which invoices are paid, pending, or verified with exact dates and customer phone numbers.

4. Customer Contacts & Leads

Every caller is automatically saved to your customer directory with past booking history, notes, and preferences for personalized future service.

WHY BUSINESSES CHOOSE VAAKRITI AI OVER TRADITIONAL SOLUTIONS

FEATURE	HUMAN CALL CENTER	BASIC VOICE BOT	VAAKRITI AI
24/7 Availability	Expensive night shifts	Yes, but repetitive	**Always on (Zero missed calls)**
In-Call GST Invoicing	Manual / sent hours later	Not supported	**Instant WhatsApp PDF + UPI**
Updating Information	Staff training takes days	Requires technical help	**Just speak into dashboard**
Cost & Setup Time	₹25,000+ per agent/month	Complex custom setup	**Up to 75% savings*, live fast**

*Based on internal estimates; results vary by deployment.

Safe, Transparent & 100% Legally Compliant

We respect your brand reputation and Indian telecom rules. Vaakriti builds trust with callers through clear disclosures, legal calling hours, and direct bank settlement.

Honest AI Identity Disclosure

Every call clearly states that the assistant is an AI ("Main Vaakriti se Arika bol rahi hoon, ek AI assistant..."). Callers appreciate the transparency, building immediate trust.

Call Recording Notice

Callers are informed that calls may be recorded for service quality, keeping your business fully compliant with customer communication laws and privacy expectations.

Lawful Calling Hours (9 AM to 9 PM)

Outbound reminder calls and campaign updates are strictly restricted to permitted calling windows according to TRAI guidelines, with automatic Do-Not-Disturb (DND) checking.

Direct Non-Custodial Money Flow

Payments settle 100% directly from the customer's UPI app into your business bank account. Vaakriti is never in the middle of your funds, adhering to RBI directives.

DATA PRIVACY & CONFIDENTIALITY GUARANTEE

Isolated Data: Your customer numbers, call logs, and revenues are strictly private and never shared.

Bank-Grade Encryption: All communications between callers, WhatsApp, and dashboard are fully encrypted.

You Own Your Data: Export call logs, customer records, and invoice histories anytime in standard formats.

VAAKRITI

Get Your Voice Assistant Live Fast

No complicated IT projects or weeks of onboarding. Set up your AI assistant and start taking calls today.

STEP 01

Share Your Business Info

Type your clinic or business services, doctor hours, or product prices. You can also just upload an existing price list or speaking notes.

STEP 02

Link Number & WhatsApp

Connect your business phone number or get a dedicated local business line. Add your WhatsApp and UPI ID to receive payments directly.

STEP 03

Make a Test Call & Launch

Call the assistant from your mobile phone to hear how naturally it speaks. Once you're happy, turn it on to handle real incoming calls.

OUR COMMITMENT TO YOUR BUSINESS

99.9% Uptime Guarantee
Engineered so your customers never experience busy tones or unreachable lines.

Dedicated Customer Support
Quick help via WhatsApp or phone call whenever you have questions or need changes.

Continuous Enhancements
Your AI assistant improves automatically with new features and refined language models.
