AUTONOMOUS VOICE TELEPHONY & IN-CALL COMMERCE INFRASTRUCTURE

Enterprise Voice Operations & In-Call Transaction System.

A unified, sub-100ms voice operations platform engineered for Indian enterprises. Executes real-time dynamic customer interactions, synchronizes business catalogs, generates GST invoices with direct UPI settlement during live calls, and enforces carrier-grade regulatory compliance.

01 • TELEPHONY CORE <100ms

Native SIP/PSTN interconnect with Indian carriers (Airtel, Jio, Vi). Natural conversation pace with zero robotic start-up delay and adaptive ambient noise cancellation.

02 • OPERATIONS BRAIN Live Sync

Dynamic enterprise memory updated in real time verbally or via API. Instantly reflects doctor/service slots, inventory changes, and special commercial pricing without code pushes.

03 • IN-CALL COMMERCE Direct UPI

Automated statutory GST invoice generation dispatched to WhatsApp while caller is on the line. Non-custodial settlement routed directly to client merchant bank accounts.

04 • VISION VERIFICATION 12-Digit UTR

Computer vision parsing of incoming WhatsApp payment screenshots across Google Pay, PhonePe, and Paytm with automated ledger reconciliation and owner alerts.
