AUTONOMOUS VOICE TELEPHONY & IN-CALL TRANSACTION SYSTEM

The voice assistant that actually runs your business.

Answer every incoming call 24/7 in natural Hindi, English, and Hinglish. Greet repeat customers by name, manage live appointments, issue branded GST invoices on WhatsApp, and collect UPI payments — all while talking on the call.

24/7 INTELLIGENT CALLING

ZERO MISSED CALLS

Speaks like an experienced member of your staff. Recognizes returning callers, checks past appointment history, answers questions accurately, and filters noisy background chatter.

Natural Hindi • Everyday Hinglish • Fluent English

SPEAK TO UPDATE BRAIN

ZERO TECHNICAL CODING

Update schedules, doctor availability, product inventory, or special festival discounts anytime by simply typing or speaking into your business dashboard. Takes effect instantly.

Instant real-time update (< 1 second across all lines)

IN-CALL WHATSAPP INVOICING

DIRECT UPI QR

The moment a caller books a service or confirms an order, a professional GST tax invoice with dynamic UPI QR code is delivered straight to their WhatsApp before the call ends.

Direct-to-bank settlement • 100% non-custodial

RECEIPT SCREENSHOT CHECK

12-DIGIT UTR MATCH

When customers pay and submit screenshots on WhatsApp, the system automatically checks the transaction reference, reconciles your billing ledger, and confirms the booking.

Supports GPay, PhonePe, Paytm, BHIM receipts

CUSTOMER RELATIONSHIP & CONVERSATIONAL CALL FLOW

Personalized Calling & Complete Customer Journey

Most voice bots treat every call like a blind stranger. Vaakriti recognizes returning customers, recalls previous booking history, schedules callbacks intelligently, and manages the entire customer relationship from first greeting to confirmed payment.

THE 4-STEP END-TO-END CALL FLOW

STEP 1
Customer Calls
Answers in 1 ring 24/7

→

STEP 2
Personalized Chat
Recalls past history & slots

→

STEP 3
Invoice on WhatsApp
UPI QR delivered on call

→

STEP 4
Auto-Reconcile
UTR verified & booked

RETURNING CUSTOMER RECOGNITION

Greets existing clients by name naturally without sounding repetitive. Confirms whether previous inquiries were resolved (*"Aapki payment last time time par ho gayi thi na?"* or *"Aapki tabiyat ab kaisi hai?"*).

- ✓ No robotic overuse: uses caller's name naturally at the start and conclusion only.
- ✓ Direct appointment rescheduling or order lookups without asking basic details again.
- ✓ Detects satisfaction and flags unhappy customers for priority owner attention.

SMART SCHEDULED CALLBACKS

When a customer asks for a callback at 4:30 PM, the system dials at that exact time, reminds them of the specific reason they asked for the call, and smoothly closes the booking.

- ✓ If phone is busy or unanswered, automatically retries later rather than dropping the lead.
- ✓ If customer declines, marks "not interested" gracefully with zero annoying spam calls.
- ✓ Full transcript and call recording saved instantly to the customer's profile.

REAL-TIME BUSINESS KNOWLEDGE SYNCHRONIZATION

Teach Your AI Simply By Speaking

Business realities shift every day. Doctors take sudden leaves, inventory gets reserved, and delivery routes change. You don't need technical staff or spreadsheets — just tell your AI what changed and it updates across all customer lines.

CLINICS & HEALTH

Doctor Schedules & Slots

Manage consultation hours and doctor leaves with live slot validation to prevent double-booking.

You say: "Dr. Verma is not available today after 4 PM. Offer tomorrow morning."
✓ AI updates immediately across all active lines.

LOGISTICS & TRANSPORT

Routes, Loads & Prices

Keep vehicles, open loads, and container rates updated with preset negotiation floors.

You say: "Mumbai-to-Delhi 14ft vehicle available. Minimum price ₹38,000."
✓ AI quotes correctly and negotiates within limits.

RETAIL & SERVICES

Stock & Festive Offers

Avoid promising out-of-stock items and apply seasonal pricing whenever you choose.

You say: "We only have Deluxe rooms left. Give 10% discount on 2-night stay."
✓ AI guides callers smoothly to available packages.

OPERATIONAL STRENGTHS OF THE OPERATIONS BRAIN

- ✓ **Updates in Real Time:** Changes take effect globally across all incoming calls in under 1 second.
- ✓ **Speak or Type:** Update via spoken voice notes, dashboard web forms, or WhatsApp messages.
- ✓ **Negotiation Safeguards:** Preserves minimum price floors so the AI never gives away margin.
- ✓ **Zero Overlapping Bookings:** Atomic calendar synchronization ensures two callers never get the same slot.
- ✓ **Complete History:** Full audit ledger tracking what rules were changed and by which staff member.
- ✓ **Automated Fallbacks:** Suggests alternative timings if the caller's requested time is taken.

INSTANT REVENUE CAPTURE ON LIVE CALLS

Send WhatsApp Invoices & Collect UPI On Call

Stop losing 85%* by waiting hours to send a payment link. Vaakriti generates compliant GST tax invoices and dynamic UPI QR codes sent straight to the customer's WhatsApp while they are talking.

IN-CALL CHECKOUT WORKFLOW

1. Customer Confirms Order

Caller agrees to appointment or service. AI confirms customer name, phone number, and address.

2. Branded GST Invoice Created

Formats official PDF with your business logo, registered GSTIN, SAC/HSN codes, and sequential invoice numbering.

3. Dispatched to WhatsApp on Live Call

Caller receives the official PDF invoice and dynamic UPI QR code on their WhatsApp before hanging up.

4. 100% Direct Settlement to Your Bank

Payments settle directly into your HDFC, ICICI, SBI or designated merchant account. We never hold your money.

TAX INVOICE

	Total Amount:	**₹1,416.00**

DIRECT UPI INSTANT PAY
UPI ID: vaakriti@hdfc • Dynamic QR code embedded in WhatsApp dispatch

*Based on internal estimates; results vary by deployment.

AUTOMATED SETTLEMENT PROOF & LOOP-PROOF ROUTING

Automatic Payment Checks & Loop-Proof Transfers

Never waste hours manually asking customers "Did you send the screenshot?" or dealing with dropped forwarded calls. Vaakriti verifies payment proof and handles human escalation seamlessly.

PAYMENT VERIFICATION — AUTOMATIC OCR

WhatsApp Screenshot Verification

Customers frequently pay via Google Pay, PhonePe, or Paytm and send a screenshot. The system automatically reads and verifies the proof:

- ✓ **Extracts 12-Digit Bank UTR:** Identifies the official transaction reference number and prevents screenshot reuse.
- ✓ **Checks Transaction Status:** Confirms the payment is marked "Successful" rather than "Pending" or "Failed".
- ✓ **Validates Expected Amount:** Matches the screenshot amount exactly against the pending GST invoice.
- ✓ **Instant Confirmation:** Automatically replies to the customer with confirmed booking and alerts the owner.

CALL ESCALATION — ANTI-LOOP SAFEGUARD

Smooth Call Transfer to Owner

When a customer specifically needs to talk to the business owner, or in family/sensitive situations, the call transfers smoothly:

- ✓ **Zero Forwarding Loops:** Dual-SIM routing prevents the dreaded loop where a forwarded call rings back to the bot.
- ✓ **VIP Priority Whitelist:** Important clients, family, and enterprise directors are routed straight to your mobile.
- ✓ **Spoken Reassurance:** Keeps the caller engaged with status updates every 20 seconds so they don't hang up in silence.
- ✓ **Pre-Call Briefing:** You see the customer's name and previous discussion notes before saying hello.

EXECUTIVE MANAGEMENT & OPERATIONAL VISIBILITY

Manage Everything From One Simple Dashboard

A clean, intuitive control center built for business owners and team members. Monitor all phone calls, bookings, customer inquiries, and collected payments in real time without technical training.

1. Live Call Logs & Audio Playback

Review every customer call with one-click audio playback and clean Hindi/English transcripts. Understand caller intent, satisfaction, and outcomes at a glance.

2. Shared Appointment Calendar

Manage all customer reservations in one shared view. Automatic WhatsApp appointment reminders are sent 1 hour prior to drastically cut down no-shows.

3. Cash-to-Call Revenue Ledger

Track total revenue earned from phone calls. See which invoices are paid, pending, or verified with exact dates, UTR numbers, and customer details.

4. Instant Multi-Channel Alerts

Receive notifications on WhatsApp, email, or connected Telegram bots for urgent calls, new payments, or requested owner follow-ups.

WHY BUSINESSES CHOOSE VAAKRITI AI OVER TRADITIONAL SOLUTIONS

FEATURE	HUMAN CALL CENTER	GENERIC VOICE BOT	VAAKRITI AI
24/7 Availability	Costly night shifts	Yes, but repetitive	**Always on (Zero missed calls)**

*Based on internal estimates; results vary by deployment.

REGULATORY COMPLIANCE, PRIVACY & REPUTATION SAFEGUARDS

Safe, Transparent & 100% Legally Compliant

We protect your company reputation and adhere strictly to Indian telecom and digital payment guidelines. Vaakriti builds trust with callers through honest disclosures, strict privacy, and lawful calling hours.

Honest AI Identity Disclosure

Every call opens with clear disclosure (*"Main Vaakriti se Arika bol rahi hoon, ek AI assistant"*). Callers appreciate the transparency, creating immediate trust.

Call Recording Notice

Callers are informed that calls may be recorded for service quality, keeping your company fully compliant with privacy standards and Indian communications regulations.

Permitted Calling Hours (9 AM to 9 PM)

Outbound reminder calls and campaign updates are strictly restricted to lawful calling windows according to TRAI guidelines, with automated National DND scrubbing.

Direct Non-Custodial Money Flow

Payments settle 100% directly from the customer's UPI app into your business bank account. Vaakriti never touches your funds, fully adhering to RBI directives.

DATA PRIVACY & CONFIDENTIALITY GUARANTEE

Strictly Isolated Data: Your customer phone numbers, call recordings, and revenue figures are private to you.

Bank-Grade Encryption: All communications between callers, WhatsApp, and dashboard are securely encrypted.

Full Data Ownership: Export your customer records, call transcripts, and invoice histories anytime in standard formats.

RAPID ONBOARDING & ENTERPRISE ASSISTANCE

Get Your Voice Assistant Live Fast

No complicated IT projects or weeks of onboarding. Set up your AI assistant and start taking calls today.

STEP 01

Share Your Business Info

Type your clinic or business services, doctor hours, or product prices. You can also upload an existing price list or speaking notes.

STEP 02

Link Number & WhatsApp

Connect your existing business phone number or get a dedicated business line. Add your WhatsApp and UPI ID to receive payments directly.

STEP 03

Make a Test Call & Launch

Call the assistant from your mobile phone to hear how naturally it speaks. Once you're satisfied, turn it on to handle real incoming calls.

OUR COMMITMENT TO YOUR BUSINESS

99.9% Uptime Guarantee
Engineered so your customers never experience busy tones or unreachable lines.

Dedicated Customer Support
Direct assistance via WhatsApp or phone call whenever you need changes.

Continuous Enhancements
Your AI assistant improves automatically with new features and refined language models.
