CUSTOMER RELATIONSHIP & CONVERSATIONAL CALL FLOW

Personalized Calling & Complete Customer Journey

Most voice bots treat every call like a blind stranger. Vaakriti recognizes returning customers, recalls previous booking history, schedules callbacks intelligently, and manages the entire customer relationship from first greeting to confirmed payment.

THE 4-STEP END-TO-END CALL FLOW

STEP 1
Customer Calls
Answers in 1 ring 24/7

→

STEP 2
Personalized Chat
Recalls past history & slots

→

STEP 3
Invoice on WhatsApp
UPI QR delivered on call

→

STEP 4
Auto-Reconcile
UTR verified & booked

RETURNING CUSTOMER RECOGNITION

Greets existing clients by name naturally without sounding repetitive. Confirms whether previous inquiries were resolved (*"Aapki payment last time time par ho gayi thi na?"* or *"Aapki tabiyat ab kaisi hai?"*).

- ✓ No robotic overuse: uses caller's name naturally at the start and conclusion only.
- ✓ Direct appointment rescheduling or order lookups without asking basic details again.
- ✓ Detects satisfaction and flags unhappy customers for priority owner attention.

SMART SCHEDULED CALLBACKS

When a customer asks for a callback at 4:30 PM, the system dials at that exact time, reminds them of the specific reason they asked for the call, and smoothly closes the booking.

- ✓ If phone is busy or unanswered, automatically retries later rather than dropping the lead.
- ✓ If customer declines, marks "not interested" gracefully with zero annoying spam calls.
- ✓ Full transcript and call recording saved instantly to the customer's profile.
